Welcome to The Tango Museum in Buenos Aires. The museum first opened in 2003. It has many photographs and artifacts displaying the history of Argentina's most famous dance, the tango. The tango has both European and African influences.

The name is believed to come from the African word "tango", meaning drum. The dance originates from the 1890s. It is a kind of ballroom dance that you do with a partner. We are going to learn how to dance the tango while we are here in Buenos Aires.

Learning Points

Asking and Saying How Far a Place Is

There are a few ways to ask and say how far a place is.

When you want to know how far a place is, you can use the question:

How far is ... ? / How far is ... from here?

You can reply with a specific distance if you know the answer, like:

It's 50 yards away.

In the USA, you use the imperial system, not the metric system.

If a place is nearby, you use yards to say how far it is.

Imperial System	Metric System
1 mile	1.6 kilometers
1 yard	90 centimeters
1 foot	30 centimeters
1 inch	2.5 centimeters

Examples:

- *How far is the museum from here?*
- *The museum is 5 miles from here.*
